PLDS

Custom Parts Reference Catalogue

Pulleydass Hardware Manufacturing Co., Ltd.

Ningbo, China · Since 2003

Edition 1.2 · November 2026

About PLDS

PLDS is based in Ningbo, China, and has supplied custom components to overseas business customers since 2003. The work centers on custom window and door rollers, window and door plastic parts, and truck and trailer rollers.

We start from your drawing or physical sample. We review the requirements, arrange tooling and production, check the parts before shipment, and handle communication and export.

The parts are made using injection molding, turning, stamping and hydraulic riveting. We review your drawing or sample to determine the production route for the part.

How to use this catalogue

The numbers in this catalogue are reference numbers. They are not stock-keeping units, and they do not describe a list of parts held ready for sale.

These examples show our experience with custom parts, rather than an off-the-shelf product range. Each new request is assessed against your drawing or physical sample.

When you enquire, please quote the reference number. Send a drawing, a physical sample, or photographs so we can review the part.

Window & Door Rollers

How we work

1. You send a drawing, a physical sample, or photographs.
2. We review the engineering requirements.
3. We arrange tooling where a new tool is needed.
4. We prepare trial samples for your confirmation.
5. We arrange production.
6. We check the shipment and arrange export.

Injection molding

CNC turning

Stamping

The photographs show equipment used in the production of our parts.

What to send us

- A drawing or 3D file, such as STEP or DWG
- A physical sample, or photographs from several angles
- The key dimensions
- The intended use
- The estimated annual quantity

Photographs can start the discussion. A drawing or a physical sample is needed before a manufacturing assessment.
